Summary

This week was vacation week.

What IIEEE completed this week:

This week is vacation week. Therefore, the progress has been reviewed so far. According to this, the remaining stage of progress was rescheduled.

Things to do by next week

- Kubernetes team
    - Solving some issues
        - Making a SQL instance connect to a Kubernetes cluster
        - Making a load balancer send HTTP requests
- Back-end team
    - Testing API with other parts
        - The back-end server should be connected with chirp stack server.
        - The back-end server needs to test API with the front-end web server.
    - Studying stress test of backend-server
        - It should be decided which tool will be used for a stress test.
- Front-end team
    - Adding graph range setting function
    - Making graphs from the database
    - Replacing search UI to dropdown format.
    - connecting sliderTooltip
- Network team
    - Making a weather station in the front-yard
    - Collecting real-time data from open weather map
    - completing making a chirp Stack server

Problems or challenges:

- None (This week was vacation week.)
